

Integrated Solutions for Access Control & Business Automation

— Customizable & Fully Scalable

Electronic In/Out Board

Easy and flexible electronic in/out board, allowing employees to sign in and out of the office as they come and go.

Health Screening

Highly configurable and customizable health screening and temperature scanning solutions for visitors and staff.

Emergency Mustering

Affordable and easy-to-use emergency management solution, customizable to suit any business.

Large Screen Display

Large-screen digital signage solution designed to display critical information viewable at a glance.

Time & Attendance

Electronic timesheet solution that automates data collection, and processes payroll quickly and accurately.

Visitor Management

Customizable and easy-to-use electronic visitor management solution that streamlines the visitor process for any business.

How Does It Work?

When staff come and go through the doors, their status is automatically updated to “In” or “Out” for communication or accountability purposes.

Use your access control system for contact tracing to know who entered the building and where they went. Also opt to open a door or a turnstile only if a person passed screening and their temperature is within your threshold.

Savance automatically keeps track of people as they pass in and out of doors, and uses a mobile tablet to 1) quickly account for people at muster stations; 2) identify missing staff, visitors, and contractors; and 3) pinpoint a missing person’s last location.

Display the in/out status of staff or visitors on large format display boards (32"-55"+), utilizing information from door swipes or from updates using a mobile device, app, web browser, or kiosk.

As credentials are swiped at a door, or at a dedicated kiosk using a badge, staff attendance is automatically tracked, and can be exported to Paychex, ADP, or to a company’s own HR system.

Revolving temporary visitor badges can be assigned, allowing for visitors to be tracked for audit purposes or emergency mustering. Badges can also be printed and dynamically activated to grant access to certain security groups for contractors.
