M4 Screw Guide

In the blue bag there are 3 sets of 4 screws: M4x8, M4x10, and M4x12.

These screws are used to secure the monitor mounting plate and accessory brackets to the back of the monitor. You will only need one of these 3 sets depending on the number of accessory brackets that you have. The diagram below will show you which size screw to use with the number of accessory brackets that you have.

With the Master Bracket system, the Master Bracket connects directly to the back of the Kiosk, so you will only need the four M4*8 screws that come with it.

M4*8

0-1 Bracket

M4*10

2-3 Brackets

M4*12

4+ Brackets
